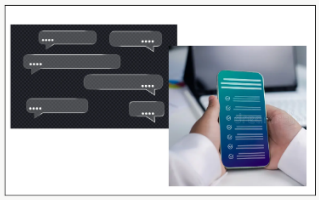
Sage Storyboard by Lindsay Manalang

Sage is a rising sophomore in college studying Pharmacy at University of South Carolina. She is passionate in the medical field and enjoys her leisure by gaming, baking, and reading.

Sage is worried about her first year living off campus. She is anxious about who she is rooming with and their cleaning habits.

Sage downloaded the new app "Behaive," a task organizer and chat room to help create order in her home.



Sage is able to have an automated task delegator and a built-in chat where she can talk to her roommates easily. There is also customization of character and colors, which adds a more personal touch to the app.

Sage was reminded to complete her 1st weeks tasks and her completion of task sent a notification to the other roommates. This app made it easier to tell who is doing what task and if they completed it. If someone notices the task is not completed the task can be delegated to someone else.

Sage now has some peace of mind knowing that all the cleaning and organizing tasks won't all be put onto her. She is able to directly communicate any troubles without getting into an argument. All of her roommates are getting along quite well since the tasks are being distributed fairly.

NEW APARTMENT MISHAPS

FRAME 1

Braeden Perham just moved into his new apartment for the college semester!

FRAME 2

He walks in to see two new guys. They had been there last year as well, so Braeden is isolated from them.

FRAME 3

Even though Braeden doesn't know them at first, they get along and start to become friends

FRAME 4

however, as time goes by, the trash just keeps piling up. Day by day, the trash just keeps getting worse and worse.

FRAME 5

Braeden keeps taking out the trash, before it gets bad, but he got tired of it and wanted to see if his roommates would take it out...

FRAME 6

Now the trash is so filled that he hears noises inside. If only Braeden had a way to get organized with his roomates from the start so they would take out the trash as well.
